CAREER OBJECTIVE

Results-driven Machine Learning Engineer specializing in Computer Vision, Deep Learning, and AI Model Deployment. Experienced in building end-to-end Computer Vision pipelines, fine-tuning custom CNNs (VGG16, ResNet50), and integrating Large Multimodal Models via Node.js/Express APIs. Passionate about deploying high-performance AI solutions with optimized inference speeds and robust full-stack architectures.

EDUCATION

Bachelor of Computer Science, Arab Open University Since 2022
– Major: Computer Science | Graduation Project Grade: B+

EXPERIENCE & PROFESSIONAL TRAINING

Microsoft Machine Learning Engineer | Digital Egypt Pioneers Initiative (DEPI) & MCIT July 2026 – Present
Cairo, Egypt

- Engineered and deployed scalable Machine Learning & Computer Vision pipelines on Microsoft Azure AI, integrating Transfer Learning and NLP Attention Models to optimize inference efficiency and classification accuracy.
- Implemented MLOps best practices using MLflow and Hugging Face for end-to-end experiment tracking, model registry, and streamlined model versioning across deployment environments.
- Leveraged Advanced Deep Learning & Prompt Engineering alongside rigorous statistical analysis to preprocess complex datasets, leading to improved model generalization and robust real-time prediction performance.

AI & Technical Skills Trainee | Arab Open University & Cisco Training Center July 2026
Cairo, Egypt

- Completed intensive practical training on modern AI concepts, deep neural network architectures, and practical Machine Learning workflows.

COURSES AND CERTIFICATES

Machine Learning Engineer Track - Digital Egypt Pioneers Initiative (DEPI) & MCIT	2026
Introduction to Modern AI - Cisco & Arab Open University	July 2026
Python Programming Basics - Information Technology Institute (ITI) / Mahara-Tech	2025

SKILLS

Machine Learning & Computer Vision: Deep Learning, CNNs, Computer Vision, Image Classification, Transfer Learning (VGG16, ResNet50, MobileNet), Model Training & Evaluation, Model Inference, Feature Selection, Data Augmentation, Hyperparameter Tuning, Ant Colony Optimization (ACO), OpenCV.

Backend & API Integration: Node.js, Express.js, RESTful APIs, Google Gemini API Integration, Model Deployment, Web APIs.

Frontend Development: JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DOM Manipulation, React.js.

Databases & Tools: Python, SQLite, MongoDB (Mongoose), Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Colab.

Languages: Arabic (Native), English (Full Professional Proficiency).

PROJECTS

Plant Detect AI Web Application (Graduation Project - Grade: B+)

Sep 2025 – June 2026

Python, PyTorch/TensorFlow, VGG16, ResNet50, Node.js, Express.js, Google Gemini API, Tailwind CSS

- Developed an end-to-end Computer Vision image classification pipeline for diagnosing plant leaf diseases utilizing fine-tuned VGG16 and ResNet50 CNN architectures.
- Enhanced dataset variability through Data Augmentation, achieving strong generalization and high diagnostic accuracy across various leaf categories.
- Integrated Google Gemini API with a Node.js/Express REST backend, enabling automated generation of bilingual (Arabic/English) diagnostic reports in sub-second inference time.
- Built a responsive full-stack web interface using Tailwind CSS and JavaScript to process client-side image uploads and dynamically render AI-generated treatment plans.

VIBE Streetwear E-Commerce Platform

September 2026

React.js, Tailwind CSS, Vite, JavaScript (ES6+), Node.js

- Engineered a dynamic Arabic streetwear e-commerce web platform featuring interactive product filtering, real-time cart calculations, and responsive UI using React.js, Tailwind CSS, and Vite.
- Built client-side state management for cart, wishlist, and promo code validation, paired with automated checkout invoice generation and WhatsApp order integration.

Elite Booking Web System

April 2026

JavaScript (ES6+), HTML5, CSS3, DOM Manipulation

- Engineered a dynamic hotel booking web system featuring real-time room pricing calculations and clean UI interaction using JavaScript, HTML5, and CSS3.
- Built client-side DOM input validation mechanisms to enhance user experience and ensure accurate reservation payload submissions.

EXTRACURRICULAR ACTIVITIES

Graduation Exhibition Presenter | Faculty of Computer and Information Exhibition

June 2026

Cairo, Egypt

- Presented and demonstrated the live 'Plant Detect' AI platform to faculty members and industry representatives, showcasing real-time model inference and Gemini API backend response speeds.
